

CALL FOR PAPERS
12th Information Security Conference (ISC 2009)
Pisa, Italy – September 7-9, 2009

ISC is an annual international conference covering research in and applications of information security. The twelfth Information Security Conference (ISC 2009) will be held in Pisa, Italy. The conference seeks submissions from academia, industry, and government presenting novel research on all theoretical and practical aspects of information security. Topics of interest include, but are not limited to:

access control	digital right management	security and privacy in pervasive/ubiquitous computing
accountability	economics of security and privacy	security in information flow
anonymity and pseudonymity	electronic frauds	security in IT outsourcing
applied cryptography	formal methods in security	security for mobile code
authentication	identity management	security of grid computing
biometrics	information dissemination control	security of eCommerce, eBusiness and eGovernment
computer forensics	information hiding and watermarking	security in location services
cryptographic protocols	intrusion detection	security modeling and architectures
database security	network security	security models for ambient intelligence environments
data protection	peer-to-peer security	security in social networks
data/system integrity	privacy	trust models and trust management policies

Paper submissions. Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers should be at most 15 pages including the bibliography and well-marked appendices (using 11-point font and reasonable margins on letter-size paper), and should be in single-column format. Committee members are not required to read the appendices, and so the paper should be intelligible without them. All submissions should be appropriately anonymized (i.e., papers should not contain author names or affiliations, or obvious citations). Submissions are to be made to the submission web site at <http://www.easychair.org/conferences/?conf=isc09>. Only pdf files will be accepted. Submissions not meeting these guidelines risk rejection without consideration of their merits. Papers must be received by the deadline of **April 7, 2009 (midnight Samoa time)**. Authors of accepted papers must guarantee that their papers will be presented at the conference. Accepted papers will be published by Springer in the Lecture Notes in Computer Science series. The camera-ready version of the accepted papers must follow Springer guidelines (a Latex source file will be required).
